EDUCATION

Bachelor of Engineering | Software Engineering (CO-OP)

SEP 2022-APR 2027

McMaster University, Hamilton, ON

- GPA: **11.2/ 12.0** – **Dean's Honour List** (2022-PRESENT).
- Relevant Courses: **Relational Databases, Data Structures and Algorithms, Object-Oriented Programming, Software Testing, Operating Systems, Computer Architecture, Concurrent System Design.**

TECHNICAL SKILLS

Languages: **JavaScript, Python, HTML, CSS, C/C++, Matlab, Java, Bash.**

Tools: **React, Django, SQL, Git, Apache, Microsoft Azure, Docker, JIRA, Gerrit, Yocto, BitBake, GitHub/Bitbucket.**

WORK EXPERIENCE

SYSTEMS ENGINEER INTERN – CIENA

MAY 2024-DEC 2024; SEPT 2025-PRESENT

- Led software development for a new Raspberry Pi-based hardware product, driving execution from initial hardware bring-up through deployment.
- Defined system architecture, evaluated software stack options, and drove design tradeoff decisions in collaboration with cross-functional technical subteams.
- Coordinated and delivered embedded software functionality for onboard peripherals, ensuring stable system operation under hardware and performance constraints.
- Delivered a containerized, **web-based GUI** (**Apache, Python, JavaScript, HTML, CSS, PHP**) to improve user interaction with embedded hardware and support a more intuitive, deployment-ready user experience.

EMBEDDED SOFTWARE ENGINEER INTERN – CIENA

JAN 2025-AUG 2025

- Supported development of an embedded C/C++ application for a hardware test platform used to validate networking hardware.
- Worked across firmware and hardware boundaries to investigate failures, troubleshoot issues, and support timely resolution during testing and validation.
- Integrated new hardware by analyzing schematics and datasheets, extending firmware functionality, and coordinating required build and configuration updates.
- Identified and resolved integration and regression issues during release testing, helping prevent downstream deployment failures.

PROJECTS

FULL-STACK PORTFOLIO WEB APPLICATION

FEB 2026-PRESENT

- Developed a full-stack portfolio web application using **React** and **Django**, building REST APIs to dynamically display projects, skills, and contact information.
- Deployed and hosted the application on **Microsoft Azure** using Azure Static Web Apps and Azure App Service.

DRONE SEARCH-N-RESCUE MODULE (INTRO TO SOFTWARE DEVELOPMENT)

JAN 2024-MAY 2024

- Designed and implemented a simulated search-and-rescue system modelling real-world constraints, including battery limits, traversal cost, and environmental uncertainty.
- Evaluated and compared multiple graph search and path-planning algorithms, balancing trade-offs between optimality and computational cost.
- Applied Agile SDLC practices through iterative planning, implementation, and testing, using structured design principles to support modular, maintainable, and reliable delivery.

EXTRACURRICULARS

- **VICE PRESIDENT OF SOCIALS – TACKLING MISINFORMATION (MCMASTER CLUB)**
- **ASSISTANT COACH – JARVIS SOCCER CLUB**

SEPT-MAY 2023
JUN-SEP 2022
